

THURSDAY, DECEMBER 1st

Chairman : Dr. E.G. Bowen

0915 - 1045

- | | |
|-------------------------------------|--|
| G. Reber | Radio astronomy at Bothwell |
| G.R.A. Ellis | A new low-frequency radio telescope |
| D.J. Cole | The Parkes interferometer |
| V. Radhakrishnan &
J.B. Whiteoak | Interferometer observations of the
OH emission from W 49 |
| M.I. Large &
P.C. Harris | Accurate reductions of radio source
positions for the Molonglo telescope |
| D.J. McLean | The formation of simultaneous radio
astronomical images and spectra by
electro-optic methods |

Chairman : Professor D. Mugglestone

1115 - 1245

- | | |
|-------------------------------------|--|
| R. Hanbury-Brown
(invited paper) | Angular diameters and effective
temperatures of some bright stars |
| O.J. Eggen &
A.R. Sandage | Examination of the evidence for the
existence of pygmy stars |
| M.J. Bessel | The variable ρ Puppis |
| A.R. Hyland | Remarks on peculiar A stars |
| A.W. Rodgers | Pulsations in Cepheid variables |
| A.A. Page | Observations of flare stars and
T Tauri stars |
