February 16th, 1950 #2 Einst Thomasple St. Chevy Chase, Md.

Mrs. K. G. Jansky 57 Silverton ave. Little Silver, N. J.

Dear Mrs. Jansky: 
2 deeply regret the death
of Karl G. Jansky. His discovery of radio
waves from the Milberguay ranks as one
of the greatest works of all time in the
field of observational astronomy. It is to
his interest and encouragement that 2 as
a later worker in this branch of science
owe much of my success.

Sincerely yours, Grote Reber [From Late Editions of Yesterday's TIMES.]

KARL GUTHE JANSKY

KARL G. JANSKY, 44

Bell Laboratories Engineer Dies-Discovered Waves of Extraterestrial Origin 1950

Karl Guthe Jansky of 57 Silverton Avenue, Little Silver, N. J., radio research engineer with the Bell Telephone Laboratories since 1928, who discovered radio waves of extraterrestrial origin in 1933, died yesterday in the Riverside Hospital, Red Bank, N. J., of a heart malady. He was 44 years

An expert on radio transmission phenomena and "atmospheric" and other types of radio interference, Mr. Jansky recently received an Army-Navy Certificate of Appreciation for his work on radio direction finders in the second World War. His work was carried on principally at the Bell Laboratorics in the laboratorics of the second world was a second was a second world was a second world was a second was a second world was a second was a second world was a second wa tories installation at Holmdel, N. J.

tories installation at Holmdel, N. J. Born in Norman, Okla., a son of Cyril M. Jansky, now professor emeritus of electrical engineering at the University of Wisconsin, Mr. Jansky received a B. S. from that university in 1927, and, in 1938, an M. A. degree. He was a Fellow of the Institute of Radio Engineers, a member of Phi Beta Kappa honor society and Phi Kappa Phi and Phi Sigma Phi fraternities.

Mr. Jansky leaves his wife, Alice

Mr. Jansky leaves his wife, Alice K., his parents; a son, David B.; a daughter, Anna Moreau Jansky; three brothers, and two sisters.
