Dr. Hermann Socher, Director
Universitäts-Sternwarte
Turkenschanzstrabe 17
Vienna XVIII, Austria

Dear Dr. Socher:

Thank you for your nice letter of October 6th. The picture which you mention was not taken by me and the party who has the negative is now in the Phillipine Islands. Consequently I cannot supply a print. However I am enclosing another picture of the same machine in a bit different position with some different equipment at the focal point. I hope it will be of some use to you.

Also enclosed are variety of other papers which deal with the general subject of radio astronomy.

When your article is published I would appreciate receiving three or four copies of the reprints or whatever form is available.

If you will keep me informed of any activity in the field of radio astronomy in your country I will deem it a great honor.

Sincerely yours,

Grate Reber
