WEATHER BUREAU
Airport Station
P. O. Box 3650
Honolulu, Hawaii

December 13, 1955

Mr. Grote Reber
Wailuku Hotel, Ltd.
Wailuku, Maui

Dear Grote:

I trust the precision aneroid arrived safely and that it has met your needs.

On Friday afternoon, Dec. 16, there will be a seminar at Oahu Research Center by Wendell Mordy, who will discuss some ideas of his concerning the growth of cloud and raindrops. This begins at 2 P. M. and you may wish to attend if you return from Maui in time. Otherwise, I will be back at the Airport by 5 P.M. or shortly thereafter and will be delighted to have you come out to the house for dinner or - if this will crowd you too much - to spend the time at the Airport with you until your plane departs. In either case we can discuss your paper. Do it whichever way is best for yourself.

See you soon.

Sincerely,

Saul Price

THE **Lord Elgin**
HOTEL
OTTAWA CANADA

30 January 1956

Dear Saul:

as you suggested, I inquired at NYU about Prof. Haurwitz. The girl said he was out of town until middle of February. By further questioning I gathered that nothing had arrived in his office from you. That was about 18th of January.

While in New York, I found that the Research Corp. took a rather dim view of my leaving a lot of expensive equipment in Tasmania. Thus it was decided that I could make some more measurements down there during the coming winter and then bring everything back to Hawaii. Consequently I am on my way to Hobart via Europe. Until next July or August my address will be

Grote Reber

General Delivery, G.P.O.

Hobart, Tasmania, Australia.

In the mean time I'd greatly appreciate it if you would act as intermediary for me and fix up that article on barometric pressure so

that it will be published in some suitable place,
On one of these sheets are corrections to one
month's values for Θ hour amplitude and phase.
This correction will remove one peak from the
amplitude curve.

I'm sorry to bother you about this rather
cumbersome matter, but presently I'm in no
position to do anything with the subject.
If and when any reprints are to be had I'd like ~~to~~
couple and will settle with you
for their cost.

Best regards,

Grote Reber.

Please remember me to your family and thanks
again for your kind hospitality. I'll see
you next autumn.

Professor Haurwitz

Chairman Dept: Meteorology & Oceanography

New York University

University Heights, N.Y. 53, N.Y.
