Africa

Dear Dr. Van Hemelrijck:

The copy of your November data arrived yesterday. Thank you very much. It certainly came in a hurry.

My observations here from the top of Haleakala volcano agree that there was substantial solar activity 23rd thru 26th of November. A new rise in activity seems to be underway now.

Examination of my file shows that your data for September 1957 is missing. I'd appreciate a copy, if any are still available.

There is a slight error in my address as it appears on your envelope. Please omit the Japon and replace by U.S.A. as follows.

Dr. Grote Reber
General Delivery
Wailuku, Maui
Hawaii
U. S. A.

Thanking you for your continued interest,
I am

Very truly yours,

Grote Reber
