Dear Mr Grote Reber,

In the name of Prof. Oort I am sending you a translated copy of a letter from the firm of Werkspoor in Amsterdam, directed to Prof. Oort.

Mirror for the receipt of the radiation from interstellar
gas

We refer to your letter of April 11 to our Ir Theunissen, with enclosed copy of a letter of Mr Grote Reber to you, dated February 24.

We are quite willing to place at your disposal the drawings of the large mirror for the receipt of the radiation from interstellar gas which have already been made.

The total cost are 3.500.- guilders.

To work out the existing drawings so as to reach the stage of the outline drawings of the assembly (details excluded) will take about 6 months.

The cost of the work on construction and drawings are about 13.000.- guilders.

Will you be so kind as to inform your American colleague on these data?

With great interest we look forward to your further intentions.

Yours truly,

Carl Blankenstein
