

# PRINCE CHARLES Motor Inn

PENTICTON, BRITISH COLUMBIA

4th October 1962

Dear Jimmy:

The interest here is a radio astronomy installation in a beautiful valley in the Canadian Rockies. These people of the Dominion Astrophysical Observatory are doing rather similar things like my enterprise in Tasmania.

My expectation of seeing you in Wheaton was frustrated by very close appointments in Charlottesville, Va. and San Francisco, Calif. Tomorrow I leave for a few days in Seattle to see the Fair and then back to Australia.

After a few finishing touches, my installation will be operating. When the data is in hand I'll be making another trip to America.

Until next year, Best Wishes

My left ear was operated on a month ago.  
The appointment at Charlottesville confirmed  
that the hearing is returning, but rather  
slowly. all very similar to right ear.  
While in hospital I found the enclosed  
article which may interest you. It  
occurred to me that in some measure,  
this is the kind of thing I've been doing  
a good part of my life!
