Dear Sir :

Paris-Match magazine, in co-edition with Larousse Encyclopedia, is publishing a series of illustrated books on the history of three sciences : Oceanography, Geology and Cosmology.

I'm just finishing the manuscript of the third volume and the chapters on radio-astronomy begin, of course, with the stories of Jansky and Reber. I found some good material, including some of your articles, but I have been unsuccessful in finding any good photograph of you and your radio telescope. As our volumes are in color, the illustration is very important and I would appreciate it very much if you could send us some photographs of you, preferably in color, but black and white would also be welcome.

The volume on Oceanography has been published last year in Paris, and the one on the Earth will be on sale in March.

Thanking you in advance for your cooperation, I remain,

Sincerely,

St. Groueff
