

23/5/94

Bear Dr. Vanden Bout:

On 21st, G.H.T. freight forwarders came thru with a quote. My material will be only a partial container. They will add other peoples material to fill container. They quote \$345 per cubic meter, or per tonne from Hobart to Charleston. Additional charges would be made for packaging and handling Bothwell to Hobart, and Charleston to Green Bank. No transit time is given. All very vague with lots of room to make additional charges. Also I don't like all this rehandling. Too much room for things to get lost, mixed, or damaged.

Let's see what else turns up. Everything is quite safe here. I'm in good health and expect to be around a long time yet. No rush.
