Mr. Grote Reber
212 W. Seminary Avenue
Wheaton, Illinois

Dear Mr. Reber:

Thank you for sending me reprints of your paper on "Cosmic Static". A number of people in our organization have shown interest in this subject.

As we discussed in Chicago, I hope you will succeed in getting formal sponsorship of your work by Harvard, M.I.T. or some other educational institution. If you do, we will be glad to help the investigation by the loan of some laboratory equipment as well as help in solving the antenna problem.

Sincerely yours,

A. G. Kandorian
