Dear Bev,

Here is a draft version of our work on the low-frequency scales. It is not final and the three authors (Rob Roger, Carman Cosrain and myself) are still working on text. The numbers are not thought to be subject to revision however.

Please feel free to quote the numerical results.

Comments, criticisms etc. would be welcomed!

Best wishes,

Alan

P.S. Could you ask Derek to send me a reprint of his paper in
Ap.J., 172, 531?
