Mr. Grete Reber,  
Radio Physicist.  
Experimental Ionospheric Research Section.  
Central Radio Propagation Laboratory.  
National Bureau of Standards.  
Washington. 25.  
U.S.A.

Dear Mr. Reber,

I would like to offer you my apologies for this tardy acknowledgment of your letter of January 19th, but at that time I became involved in a rush Radar project with the Canadian Marconi Co., and we have been working literally night and day.

It was not until, through your good offices, that I heard from Mr. Covington of the N.R.C. and realized that I had not thanked you for your letter and enclosures. Please do accept my thanks for same and the helpful suggestions.

May I wish you every success in your interesting work.

Yours very truly,

*W.P. Delphin.*
