IN REPLY PLEASE QUOTE :

Dept. Anthropology,
6th Octalr.

Dear Dr. Reber,

Thanks for your letter. Before I went to Tasmania, many people said that there was only one good site on the island viz Rocky Cape, but fortunately for me, they had never used their eyes!

I intend to return this summer, and spend about 6 weeks from end of December, to 1st Feb at the West Point midden (the one that you showed me). I hope to have about 10 people with me.

Then during Feb, I intend to do a thorough pilot survey and excavation at Rocky Cape. Your information as to depth

and nature of deposit, should be enormously useful.

If, when work commences at R. Cape, you could show me exactly the disturbances, and extent of pits, on the site itself; this would be very helpful.

Should Mr. Bennett or yourself wish to visit us, or assist at either West Point, or Rocky Cape, then you are of course very welcome.

I am now looking forward to the trip, and ~~providing~~ providing I get the money from the A.I.A.S., I shall be there at the end of December.

My regards to Mr. Bennett,

Yours sincerely,

Rhys Jones.
