March 25, 1950

Dear Mr. Reber,

It was so kind of
you to write me at the
time of my beloved hus-
band's death.

I also appreciated
your very high praise
of his scientific work.
It has taken many years

for the scientific world
to recognize his contri-
bution for what it is
worth but a few scientists,
including you, Mr. Reber,
have recognized him
and his work publicly.
He was most appreciative.

I wish you great
success as you continue
your fine research.

Very sincerely,

Alice Knapp Jansky
