Dr. Seth B. Nicholson
Carnegie Institution of Washington
813 Santa Barbara Street
Pasadena, California

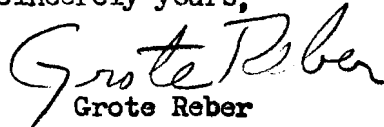

Dear Dr. Nicholson:

Enclosed are two pictures which I had made about ten days ago. I hope they are suitable for the purpose you wish.

As of yesterday, the last of my 128 poles each 77 feet long had been erected. These cover an area of approximately one square kilometer. Soon wiring will begin. With good fortune everything should be in working order for the observing season which starts about middle of May.

I am,

Sincerely yours,

Grote Reber
