Dr. Elliott P. Moore
Workman 209
New Mexico Institute of Mining and Technology
Campus Station
Socorro, New Mexico 87801

Dear Elliott:

Dr. Grote Reber will be delighted to give a Seminar on Wednesday, March 24, at 4:00 p.m. I believe that it has been scheduled for Workman 26. His topic will be "Endless, Boundless, Stable Universe", which he says will give an alternative to the Big Bang Myth.

We will be pleased to pay for the refreshments and Bob Dorr has discussed charges with Miss Julie Johnson.

Dr. Reber is going to give a talk at the VLA Site on Tuesday, March 23, at twelve noon on the construction of the first radio telescope and the early days of radio astronomy. We would be honored if any of the Tech faculty or students would find it possible to attend.

I am enclosing some background data on Dr. Reber which you might use as well as copies of his two letters.

Very truly yours,

John H. Lancaster
Manager, VLA Project

Dr. Grote Reber
c/o McKee Engineering Corporation
411 West Colfax Street
Palatine, Illinois 60067

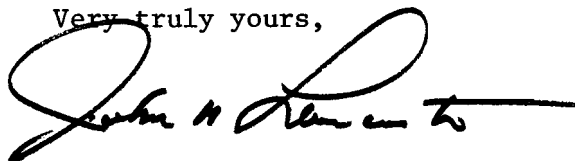

Dear Dr. Reber:

The arrangements are completed for your two talks, one at the VLA Site and one at the New Mexico Institute of Mining and Technology. There are enclosed copies of the notices on each.

As far as we can determine, Dr. Bart Bok is alive and well although his wife died during the last few months. His address is University of Arizona, Steward Observatory, Tucson, Arizona 85721, and his telephone number is 602-884-2589. If you wish, I can have Dr. Mark Gordon at the NRAO Tucson office contact him for you.

We are looking forward to your visit starting on the 22nd.

Very truly yours,

John H. Lancaster
Manager, VLA Project
