Columbus,
OHIO. 43210 ... U.S.A.

Greetings John,

Several years ago you published an article or articles about ionization caused by satellites, which I cannot find. Please send me reprints or suitable references. Enclosed is a reprint of one of my recent publications. I look forward to reading your new book "Radio Astronomy" mentioned in your recent letter.

Solar activity is rising. My observations here are about completed and will be written up soon. Next year I will be in U.S.A. and hope to see you then.

Best regards,

Grote Reber.
