Dear Sirs:

This note is in response to your ad in yellow pages. Sometime in June or July, I'll want to ship about 50 small boxes of various sizes and weights to Green Bank, West Virginia, U.S.A. Their contents will be antique radio equipment. Overall size probably 6 to 7 cubic meters. Total weight 3 to 4 tonnes. They should easily fit into one container. Please send literature explaining what you can do, how long, and how much.

I am,

Yours faithfully,
