Dear Dr. Bridle:

This is just to let you know that your paper has been
accepted for inclusion in the Jets Conference Proceedings.

Thank you for your prompt submission.

Yours sincerely,

R.N. Henriksen
Editor
Jets Conference Proceedings

Dear Dick,

Here is my review for the C.I.T.A. Workshop Proceedings. You're getting it early, as I will be in New Mexico from 25th July to 22nd August, and there won't be time for it to overcome the U.S.-Canada mail delay if I finish it on my return. As a result, I do not have glossies for my two Figures, but have included in the master copy some high-quality laser printer output of both of them. I hope this will satisfy *Can.J.Phys.* standards. I will leave duplicates with our graphics people so that I can have glossies by the time I return from New Mexico. I will send glossies to you at that time if you judge that they will be needed. In any case, I trust the present versions will suffice for the Sept. 1 deadline.

It was a good meeting and I look forward to seeing the Proceedings in print. Good luck with the "editing". It will be interesting to see what happens in Taos when the observers meet the plasma physicists and the numerical simulators *en masse*.

With best wishes,

Alan
