

THE REBER DISH
National Radio Astronomy Observatory
Green Bank, W. Va.

Rec'd 26th

After the discovery of radio astronomy by Jansky in 1932, Grote Reber built the first parabolic telescope and extended the discovery observations through mapping the sources of principal intensity.

Color by C. H. Ruth

Dr. Reber:

I mentioned a while back that there was a postcard of this. Here it is.

If you'd like any unsullied, let Dr. Dixon know before Monday, 26 May.
