Dr. Sturla Einarsson
Department of Astronomy
University of California
Berkeley 4, California ,
U. S. A.

Dear Dr. Einarsson:

Thank you for your good letters of 26th June and 1st August. I am sorry that I overlooked answering the former. Your kind invitation is greatly appreciated and I am happy to accept the hospitality of the Society.

The exact details of my plans are not yet known. However, I believe my stay in the San Francisco area will be limited to the period 25th thru 30th September.

My remarks at the Society Dinner should be limited to ten or fifteen minutes, I presume. Perhaps a few words about the early experiments at Wheaton followed by a short discussion of the latest experiments here would be suitable. By deleting everything between the above time limit can be achieved. A few 2" by 2" color pictures will be available if desired.

I will be happy to visit the U. of C. and Stanford radio astronomy observatories at their convenience.

Looking forward to a pleasant few days in San Francisco, I am,

Sincerely yours,

Grote Reber
