Dear Covington:

Recently a variety of publications including "NRC 10.7 cm Radiotelescope" and several articles on results secured plus data tabulation sheets January thru June 1952 arrived here via Wheaton, Illinois. Thanks very much. They will provide interesting reading.

While I am no longer with NBS, I am still interested in radio astronomy and will appreciate being kept on your mailing list. Please have Miss. Pigeon change my address to the above as I expect to be here for the next couple of years.

Enclosed are some postcards. When I am finally in going shape I will send you some fotos of my apparatus. Presently we are still putting structural members together and into the air. Please remember me to Williamson.

Best regards

Grote Reber
