Gentlemen:

For the past several years I have been doing research work on astronomical radio problems (see *Astrophysical Journal* Nov. 1944). Recently it has come to my attention that somewhat similar work is being done in Australia. In order that I may be informed on these matters I would appreciate receiving a copy of the following report.

"Solar Radiation at Radio Frequencies and its Relation to Sunspots" by J.L. Pawsey, R. Payne-Scott, L.L. McCready. RPR 24, 16th June 1946
Commonwealth of Australia
Council for Scientific & Industrial Research
Division of Radio Physics.

If any charge is associated with the above report I will be pleased to remit by check upon receipt of a bill.

Yours very truly,

Grote Reber
