20th March, 1967.

Mr. Grote Reber,
Research Corporation,
405 Lexington Ave.,
New York 17, N.Y.,
U.S.A.

Dear Sir,

I have corresponded with Mr. Arthur Covington, Radio Astronomy Group, National Research Council, Canada, concerning a radar antenna and electronic control gear which I have been fortunate enough to obtain as surplus from Nadi Airport.

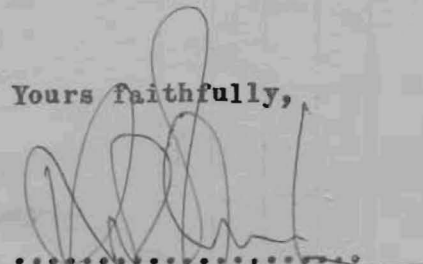

I would like to see this re-established in Suva and thus form the nucleus for radio astronomy investigations or similar work here by an interested group and would of course be happy to co-operate and work in with such a project.

It would take fairly small funds to move the equipment from Nadi to Suva and the purpose in writing to you is to inquire whether perhaps this could/ utilised by a group so that this equipment is retained here for useful research work.

I could look after matters at this end, and hope with the agreement of all concerned it may also prove possible to personally carry out some radio astronomy investigations.

I would be pleased to hear from you.

Yours faithfully,

.....
Karl R. Fleischman
