

July 14th, 1966.

Dennistoun, Bothwell,
Tasmania, Australia.

Mr. Joe L. Evins,
Representative from Tennessee,
House Office Building,
WASHINGTON, D.C., U.S.A.

Dear Mr. Evins,

Allow me to introduce myself as an American citizen of long standing, conducting scientific studies at this remote place. I try to keep in touch with affairs in U.S.A. by correspondence with my friends and thru the pages of SCIENCE magazine. The uneven distribution of science funds across the nation has annoyed many people for some time.

Enclosed is a short reprint from SCIENCE which you may find interesting. I will have more to say on these matters at various levels when I return to U.S.A. next year. If any are available, please send to me one copy of "Independent Offices Appropriation for 1967, Part 2, Hearings and Report".

Yours faithfully,

Grote Reber.
