6th January, 1965.

Dr. John G. Bolton,
Radio Astronomy Observatory,
California Institute of Technology,
PASADENA, CALIFORNIA, U.S.A.

Dear John,

Thanks for your good note of the 30th last.
The service is beyond the call of duty. The source
I have agrees in position to my limit of accuracy of
about one degree. It may be a chance coincidence
or perhaps not. I have a hunch my source is rather
close.

Can Minkowski produce a photo and spectrum?
Has he tried to measure the red shift, if any?
I'm rather interested in the optical evidence and
would like to see some prints of whatever is
available. Thanks for your trouble.

Best regards,

Grote
Grote Reber.
