Dear Sir,

I have been reading your articles on "Cosmic Static" with the greatest interest. I have noticed that you have experimented on 3000, 900 and 160 megacycles per second and I intend to reedit these experiments in our country, especially as to the effect of solar radiation.

I think it would be of the greatest interest for American and French scientists to exchange information on this subject. I promise to do so now on. Could you be so kind as to keep in touch with me and send me anything you have published or might publish on this particular subject.

Thanking you in advance,

I remain

Yours truly

J-L Steinberg.
