

2nd September, 1965.

Dr. Charles M. Huffer,
5059 Campanile Drive,
SAN DIEGO,
California, U.S.A.

Dear Dr. Huffer,

Thank you for your letter of 27th last. All my old records are in deep storage at Bound Brook, N.J. Here I am still taking data. Only special features have been worked up. Enclosed is a print of faint source in Pictor taken at 2085 kilocycles. The beam width is 40 minutes of time. You may use this print and picture you now have without charge. I trust your new book will be as successful as your earlier one.

Yours faithfully,

Grote Reber.
