Mr. A. Peace
Pr. Alexanderstr. 25
Eindhoven,
Netherlands

Dear Brother:

Dear Mr. Peace:
During the summer months different members of the church
Class, in my class, please pardon the delay in
replying to your letter of July 3rd. I am
of these members for their help.

Measurements were made here on solar
intensity at 480mc over several days each side
of July 14th and on this date. Nothing was
noted which was at all unusual. The sun had
the same general order of luminosity on these
days as it has had on other relatively quiet
days. Observations of spots showed a few to
be present but nothing particularly unusual.

I am sorry there was nothing outstanding
to report during the middle of July. However
I will be pleased to keep in touch with you
or anyone else who is interested in these
types of measurements.

Mr. Wallace is employed by the Louisville & Nashville Railroad
in an official capacity. He holds a Teachers Certificate for Bible
teaching and has taught Bible in other
churches.

We are very glad to hear that you are
let us make this a rallying point to build up the church
power and in many ways. We urge every man to attend the install-
tion service Sunday, September 14th at 11 a.m. and to lead us
government to our teacher by regularly attending class. Let
us all uphold him in prayer that we might all grow in grace and
in the knowledge of Jesus Christ our Lord.

Sincerely yours,

Robert J. Hollenback
President
