

31st March, 1967.

Dr. J.A. Galt,
Dominion Radio Observatory,
Post Office Box 248,
Penticton, B.C.,
CANADA.

Dear Dr. Galt,

My radio astronomy observations here have come to an end due to rising solar activity. I will be returning to NYC. If convenient, I would like to stop a few days in Penticton and see your establishment in a leisurely manner. Comparison of my results with yours may be enlightening. My tentative plan is to arrive in Penticton from Vancouver late afternoon or early evening Wednesday May 31st. On Sunday, June 4th I'll take the same flight eastward to arrive in NYC early Monday morning. Exact times will be known when I have detailed information on flight schedules. Please let me know if the above program is agreeable to you.

Best regards,

Grote Reber.
