Dear Alan,

A belated thanks for your mammoth list of galaxies. Frank Ghigo, a student here working on optical identifications of OSU sources, wondered whether the list was made up from cards and, if so, whether we could somehow get a copy. I thought you told me you kept in an H-P cassette or something, in which case forget it!

Are you ever going to do anything about circulating variability data (e.g. mine!) or, failing that, sending me a list of possibly interested people?

Tough about the shingles--hope you're recovered now. We were up your way around Christmas, and I'll be at Scarborough for a couple of colloquia February 12 and 13 but start observing February 15 so, as usual, no time to drop by your neck of the (literal) woods.

My NRAO stuff is high on the list for writing up, but one or two items come before it. It looks useful and interesting. Hope things are well with you both. Greetings from Bev also.

Sincerely,

A handwritten signature in cursive that reads "Derek Wills".

Derek Wills
