OFFICE OF THE MUSEUM STAFF

October 31, 1947

Mr. Grote Reber,  
212 West Seminary Avenue,  
Wheaton, Illinois.

Dear Mr. Reber:

In a story on "Electronics in Astronomy," I have mentioned your work in exploring the Milky Way using the electro-magnetic radiations from the stars.

I would very much like to illustrate this particular part of the story with some photographs of your apparatus. Particularly the huge 31 foot mirror with the drum receiver and anything else which you think would be of interest in a popular paper.

I would appreciate it very much if you could loan me some of these photographs for this purpose, and I will try and return them as soon as reproductions have been made.

With many thanks for your courtesy, I am

Cordially yours,

I. M. Levitt  
Assistant Director  
The Fels Planetarium
