A1/3/1

22nd January, 1964.

Mr. Grote Reber,  
Tasmanian Regional Laboratory,  
C.S.I.R.O.,  
"Stowell",  
Stowell Avenue,  
HOBART, Tasmania.

Dear Grote,

I have managed to trace the radio map of the Large Magellanic Cloud which you mention in your letter to me of the 14th January last. As you surmise, this was derived from Alec Shain's observations at 19.7 Mc/s and forms part of a paper presented at the Paris IAU-URSI Symposium in 1958. It is included in the Proceedings of this Symposium (page 328) which was published by the Stanford University Press under the general editorship of R.N. Bracewell. I daresay you already have a copy of the Proceedings of this Symposium. I am sorry we do not have a reprint of the paper.

Kind regards,

Yours sincerely,

(A.J. Higgs)

ASSISTANT TO THE CHIEF
