Mr. Grote Reber,  
"Stowell",  
Stowell Ave.,  
Hobart, Tasmania.

Dear Mr. Reber:

It will be a pleasure to have you visit us again.

The dates you suggested, May 31 to June 4, will be satisfactory.

We have had considerable success with our 22 MHz and 10 MHz projects during the last couple of years and will be eager to hear about your latest series of experiments.

Although the new timetables are not yet out I have inquired from the airlines and you can leave Vancouver daily at 20:05 and arrive Penticton 21:50 with one stop in between. The only flight east leaves Penticton daily at 08:50 and gets to Calgary at 11:35. These times should fit in OK.

Unless we hear differently we will plan to meet you at the airport at 21:50, May 31st. We will reserve a room for you at the Prince Charles Hotel for May 31 to June 4.

At present we are working on a 3000 km baseline interferometer between Algonquin Park and Penticton, --- it hasn't worked yet!

Best regards,

Yours sincerely,

  
John Galt.  
Officer in Charge.
