

22 September 75

Director
Radio Astronomy Observatory
Penticton, B.C.,
Canada

Dear Sir:

Next month I'll be on a trip to North America, arriving in San Francisco on 21st. Several years ago I visited your observatory while the 22mc T antenna was under construction (about 1962). I would like to see the progress made since then, and particularly the 10mc antenna.

I propose to arrive by air on weekend 25/26th. Details now unknown. Please book some hotel accommodation for me. If appropriate, I can give a short discussion on some astronomical subject. on 27th or 28th. I plan to be in Chicago by 30th.

Please advise if the above is convenient.

Very truly yours,

Grote Reber
