

25th February 1963

Dr. V. Bargmann  
Department of Physics  
Princeton University  
Princeton, New Jersey, U.S.A.

Dear Dr. Bargmann:

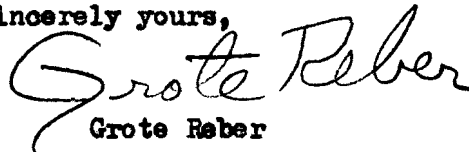

Recently I read with much interest your comments in *Science* (21st December 1962, page 1351) about predictions by Velikovsky. Your second point about the magnetosphere of the earth is in agreement with my findings by indirect methods. Please see:

*Nature*, 1955, 8th January, pp 78-9

*Journal of Geophysical Research*, 1958, March, pages 109-123 and particularly pages 117 & 121.

In both cases the observations were made during the two years prior to publication. I would like to send to you reprints of these but unfortunately I do not have copies with me.

Sincerely yours,

  
Grote Reber
