

December 5, 1960

Mr. A. R. Thompson
Director of Publications
Bell Telephone Laboratories
463 West Street
New York, New York

Dear Mr. Thompson:

Just a note to recall the pleasant day we spent together at Green Bank last summer. Since then, I have collected a considerable number of Model T Ford wheels and axles. They are all carefully packed away in storage. When you need them for the reconstruction of Jansky's antenna, I'll be pleased to make their donation.

Shortly, I am leaving for an extended period in Australia. However, I may be readily contacted via the address atop this letter. Hoping that next summer will see a reproduction of Jansky's antenna gracing the right side of the recent entrance at NRAO, I am

Sincerely yours,

Grote Reber
