October 23, 1967

Dear Alan,

Just to let you know that I have received and corrected the proofs of 'New limits....some radio sources'. It is scheduled for December Observatory.

They made rather a mess of it in places, especially in the tables. They also changed your comments on IPS data from '50% less than 0".1 , for example, to 0.5 less than 0".1 - it was promptly changed back again. There are now spaces between blocks of 5 sources in Table I, as they had crammed it too much. I also remembered to correct the spelling of Kellermann and to order an extra batch of reprints for you.

Let's hear all the news when you have time - have you been to Algonquin yet? Christmas in Penticton?! Give my regards to the Caswells and Gowers. Am expecting to hear results of meeting of Board of Grad. Studies any day!

Cheers for now,

*Derek*

P.S. MSL has just gone to Italy, officially to attend a sort of conference on Rel. Astrophysics.
