Yale University Observatory
Box 2023, Yale Station
New Haven, Connecticut
U. S. A.

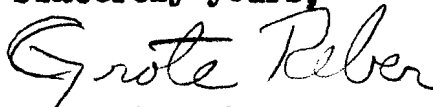

Dear Harlan:

Thank you for your good letter of the 18th January. I am flattered and indeed surprised at being considered for this outstanding honor again. I do not yet have anything to talk about. However, I expect my new array to be in working order by autumn. At least preliminary results should be available by early winter.

I am happy to accept the invitation to give the Russell Lecture at Yale. My subject will be "Hectometer Cosmic Static".

Looking forward to seeing you again and examining your new Jupiter antenna, I am

Sincerely yours,

Grote Reber
