Dr. Grote Reber,
Dennistoun,
Bothwell, Tasmania,
Australia.

Dear Dr. Reber:

Thank you for your letter of February 13, 1967 which reveals some of the more intimate "Domestic" circumstances surrounding the Ozma project at Greenbank.

It is indeed interesting how an idea will snowball and carry the originators along in spite of misgivings. Perhaps a hint of this might have been proper in the review, but as you can judge radio astronomy is not my field.

I do appreciate your letter, and would agree that "waving around for all to see" is a good thing. This I would leave to the diplomacy of someone such as yourself whose authority would be unquestioned.

Very sincerely yours,

Malcolm M Thomson

Malcolm M. Thomson,
Chief, Astronomy Division.
