Dr. Grote Reber,  
General Delivery,  
Wailuku, Maui,  
Hawaii.

Dear Sir:-

I have just seen your very interesting paper in J. Geophys. Res., 63 (1958), 1, 109; a paper which you mentioned, in a letter, that you were writing.

Many thanks for giving my Counterglow translations the nod.

This is a most interesting subject, which I'd like to get back to, some time; there is now so much new information that needs tying in.

I have been reading papers about spread F (a subject which I believe you got under way). For instance Briggs (J. Atm. Terr. Phys., 12, No.1, 34), Singleton (Aust. J. Phys., 10, p. 60), and in connection with radio star scintillations Harrower (Canadian J. Physics, 35, p. 512). And many others.

Shortly I hope to get out a set of translations on the Zodiacal light, and another on dust.

Best Wishes,

Yours sincerely,

*E. R. Hope*

(E. R. Hope)

for Chairman, Defence Research Board.
