Meudon Observatory
Meudon, Seine et Oise
France

Dear Dr. Azambuja:

I have been interested in radio astronomy as the enclosed reprint describes for some time. Recently I was shown the April/June 1947 issue of the Quarterly Bulletin of the International Astronomical Union, #78, Part IV on pages 93 and 94 gives data on Solar Radiation at Radio-frequency. For my work, I wish to secure all of this information which has been and will be published. Consequently I desire to subscribe to the Quarterly Bulletin of the I.A.U.

Please advise me of the annual rate post paid in order that I may send the proper remittance. Also please set aside one copy of all back issues which carry Part IV above so that my file may be complete on this subject. Please reply via air mail in order that I may arrange to send the proper sum and get on the subscribers list as soon as possible.

Very truly yours,

Grote Reber

Enclosure
