Dear Derek,

Thank you for your note about 178-MHz variability. The committee has received a number of such communications, which we will send out together in the Fall.

I enclose two preprints of our work on galaxy-radio source orientations. We have been compiling a "search list" of radio-galaxy identifications (over 1000 objects!) for which we will be making inspection overlays. Would you be interested in a copy of the list?

When will you be at NRAO again?

Best wishes,

Alan H. Bridle.
