

September 14, 1962

Dr. Sturla Einarsson
Department of Astronomy
University of California
Berkeley 4, California

Dear Dr. Einarsson:

My plans have now formed as follows. I will arrive at San Francisco by United Airlines at 7:15 P.M. on the 27th. That night I will stay at the Hilton Hotel near the airport. The morning of the 28th I will take the helicopter to Berkeley and taxi to the Faculty Club where I will meet you at noon. After the festivities that evening I will be pleased to accept the hospitality of the Society at the Faculty Club.

It does not appear practical for me to visit the Stanford and University of California radio astronomy observatories as various commitments have already been made for the 29th and 30th.

After the dinner I will talk upon the subject, "Large Radio Telescope Design," and show a few slides which demonstrate results secured. It would be very desirable to have a large blackboard with colored chalk available to explain future plans. This subject may be controversial and I will welcome comments from the gathering. The chairman will be responsible for closing the discussion at an appropriate time.

Looking forward to meeting you at noon on the 28th and the festivities that evening, I am

Sincerely yours,

Grote Reber
