Gentlemen:

This letter is based upon second hand information. It seems that last November you produced a TV documentary about President Kennedy as a memorial to twentieth anniversary of his death. Therein you had excerpts from a speech he made promoting the space program. The year was 1961 or 1962. This speech contained references to, and pictures of, space scientists of that day. I am informed that I am among those mentioned and shown during that speech.

Please look into the matter and let me know what substance the above discussion has. Also, it seems a copy of this documentary was sent to Australia and probably reposes in Sydney. I'd like an opportunity to view this film, or tape. It could be sent to Hobart where two TV studios are available. I'll need your permission plus suitable instructions to studio of TVT6 or ABC-TV. Your assistance on this matter will be greatly appreciated by me.

I am,

Sincerely yours,

Grote Reber
