

G. R.

Mr. Rhys Jones is at present working his way down the East Coast and will arrive in Hobart at the end of this week.

His contact point in Hobart is at the Geography Dept. of the University - but with whom I do not know.

If you know anyone in the Geog. Dept. you may be able to find out more about his movements - where he will be staying etc.

The above information was given to me by a lass in the Launceston Museum in the absence of Frank Elles who is in Hobart
