

Australia Fair

Australia is a country without problems. There are no race difficulties like South Africa, Fiji, Malaysia, England and parts of U.S.A. No religious conflicts are present such as North Ireland, Cyprus, Lebanon. Language barriers do not exist like in Canada, and most of Europe. Guerrillas similar to North Ireland, Argentina, Palestine are absent. There are no armed borders like Central Europe and most of Arab world plus Korea. Grinding poverty and mass death such as Central Africa and Bangladesh are unknown. Over population as Brazil, India, China, Japan, Indonesia will never occur. Runaway inflation like Argentina, Chile, Central Africa is not present. Illiteracy like most of South America, Africa and Asia is practically unknown. Society is not hampered by an archaic system of writing like China, Japan and probably Russia.

The Australian people have practically unlimited freedom, which a few cannot distinguish from license. Australia is abundantly endowed with resources of agriculture, minerals, climate and energy. For talking purposes, Hawke and Whitlam are trying to drum up some problems. The results of their efforts are peanuts. The Australian people have a very good thing, far beyond the wildest dreams of most of the people of the world; and most Australians don't know it. Someday they may wise up and decide to inaugurate a Thanksgiving Day. This would be a swell excuse for taking another day off from work.
