Dr. Bart J. Bok  
Harvard College Observatory  
Cambridge 38, Mass,

Dear Dr. Bok:

Enclosed is the manuscript of the talk for the Boston A.A.A.S. meeting. I believe it to be suitable for a gathering whose majority has only a meager knowledge of radio astronomy.

It is possible that Dr. John D. Kraus of Ohio State will be at the meeting. If so, I nominate him to present the paper. If not, you may use your own judgment.

My only suggestion in regard to the program is that the papers be placed in order of (3), (4), (1), (2) as being merely a bit more logical sequence of distant to near. While I don't know what Hagen has, perhaps the audience would feel on firmer ground if all the historical material I have included was gotten out of the way first. In any case, use your own judgment as to what is best.

Aloha,

Grote Reber
